

Workshop on

## **Geodesign methods for collaborative strategic planning**

Michele Campagna  
(Università di Cagliari DICAAR Italy)  
campagna@unica.it

After a short introductory seminar on geodesign methods, we will work on a geodesign workshop tutorial on a real-world strategic planning case study. For this workshop we will be using Geodesignhub ([www.geodesignhub.com](http://www.geodesignhub.com)). The software is a digital web based collaborative planning support system. The geodesign workflow enables the application of system-thinking and real-time impact assessment, to support the rapid creation of conceptual designs to address large and complex geodesign problems, through collaborative design crowdsourcing, alternatives generation, and negotiation towards consensus. It is designed to foster collaboration among professionals and their clients, among teams of professionals, and negotiation among stakeholders, especially during the early stages of design.

### *Equipment:*

*Please bring your laptop computer and have Google Chrome or Mozilla Firefox installed and updated.*
